"We live in exciting, historic times. The Blockchain era has tremendous potential and promises to change the economic order. In a very short time, it is going to disrupt many sectors and decentralize them, giving the power to the people. Those who make use of the decentralized platforms will have the opportunity to reap benefits that were previously limited to centralized companies and organizations".

Prof. George M. Giaglis

Professor Giaglis the Director of the Institute For the Future (IFF) at the University of Nicosia, Cyprus. He has been working on digital currencies and blockchain applications since 2012.

George is one of the first academics to research and teach on blockchain, having: designed the curriculum of the world's first full academic degree on blockchain (MSc in Digital Currency at the University of Nicosia); led the development of blockchain credentialing technology that has resulted in the first ever publishing of academic certificates on the blockchain; taught on the disruptive innovation potential of blockchain; organized a number of prominent blockchain conferences and events. In his career, he has published more than 150 peer-reviewed papers in leading scientific journals and conferences and serves in the editorial board of seven academic journals, including Ledger.
